

Rajat Mishra

UI/UX Lead • Product & Web Designer

Mumbai | [+91 9719499553](tel:+919719499553) | rmcool26@gmail.com | linkedin.com/in/rmcool26

PROFESSIONAL SUMMARY

rmcool26.webflow.io

UI/UX Lead with 9+ years of experience designing and delivering user-centered web and application interfaces. I have primarily worked on end-to-end UI/UX including requirement discussions, user flows, wireframes, visual design, developer handoff and QA support.

Most of my experience comes from early-stage and product-focused teams where I helped build products from scratch, worked closely with founders and developers, and supported hiring and mentoring designers.

Delivered measurable improvements in speed, engagement, and usability across multiple products.

CORE SKILLS

- UI/UX Design (Web & Application) • User Research & User Flow Creation • Wireframing & Prototyping (Figma)
- Design Systems & UI Guidelines • Design to Development Handoff • HTML & CSS (Working Knowledge)
- WordPress (Custom Builds) • Product Thinking • Team Leadership & Mentoring • Stakeholder Collaboration
- QA & Usability Testing • Jira / Trello • Accessibility Basics • Figma Auto Layout

WORK EXPERIENCE

TERRANXT PVT LTD — Lead UI/UX Designer

Gurugram • 2022 – Present

- Joined the company when the team had only 2 members and took ownership of UI/UX for multiple products.
- Built a scalable design system (tokens, components, states) improving design velocity and consistency.
- Worked closely with founders to understand requirements and convert them into usable designs.
- Strengthened developer handoff through structured Figma files, clear UI guidelines, and HTML/CSS-based UI structures where required.
- Actively participated in manual testing and bug tracking using Jira/Trello, tightening design → dev → QA loop.
- Contributed to hiring/mentoring; design function scaled as company grew from 2 to 12 members.

INDIAN INSTITUTE OF DIGITAL EDUCATION (IIDE) — Executive Web Designer

Mumbai • Jan 2021 – Dec 2021

- Improved engagement and conversion across learning/marketing pages through iterative UX changes.
- Shipped responsive experiences using HTML/CSS/JS and WordPress (Elementor, Oxygen, WooCommerce, Gravity Forms, LearnDash, CRM/Tag Manager integrations).
- Conducted usability testing and implemented changes based on feedback.
- Guided junior team members and supported timely project delivery.

SKYMAP GLOBAL (GIS) — Software Engineer (UI-Oriented)

Dehradun • 2018 – 2020

- Supported a GIS web app for large-scale mapping; collaborated on UI visualization for digitized building data.
- Coordinated with international team on UI/application structure for scale.

DREAMZ GROUP — Junior Web Designer

Remote • 2014 – 2017

- Delivered multiple client websites (HTML/CSS, WordPress); improved UX and responsiveness.
- Led discovery → delivery; managed parallel projects with consistent timelines and quality.

EDUCATION & CERTIFICATIONS

TUTEDUDE — Advanced UX research

Online • Dec 2025 – Ongoing

Figma • FigJam • Zeplin/Dev Mode • Jira • Trello • Google Analytics basics • Miro • Notion • QGIS • ERDAS

CASE STUDY SNAPSHOTS

SOLAR WEB APP — Terranxt Pvt Ltd

consumer.pvnxt.com / epc.pvnxt.com / installer.pvnxt.com

- Problem: Consumer, EPC, Installer workflows were fragmented, causing delays and support issues.
- Role: Led UI/UX — from research to QA.
- Approach: Collaborated with solar engineers and founders to simplify workflows into intuitive screens with reusable components, and dev-ready specs.
- Outcome: ~30% faster task completion, fewer support queries.

CONSUMER MOBILE APP — Terranxt Pvt Ltd

[consumer app](#)

- Problem: Users faced onboarding confusion and support dependency.
- Role: Designed mobile flows, prototypes, and usability tests.
- Approach: Designed mobile flows, created onboarding prototypes, and conducted usability testing.
- Outcome: Smoother onboarding and reduced support load.

SCADA MONITORING APP — Terranxt Pvt Ltd

scada.pvnxt.com

- Problem: Solar operations lacked real-time clarity.
- Role: Created monitoring dashboards and alert flows.
- Outcome: Improved transparency and reduced manual tracking.

LEAD GEN & LEARNING JOURNEYS — IIDE

[iide.co](#)

- Problem: Low engagement on key marketing/learning pages.
- Role: Redesigned layouts, ran usability tests.
- Approach: Conducted heuristic evaluations, redesigned layouts, and ran usability tests.
- Outcome: ~40% lift in engagement and better funnel clarity.

GIS VISUALIZATION — Skymap Global

[sarathi](#) / [geoai](#)

- Problem: Large-scale mapping UI was cluttered and slow to learn.
- Role: Simplified UI, improved visual hierarchy.
- Approach: Simplified UI structure, applied visual hierarchy, and standardized symbology.
- Outcome: Faster onboarding and better operator accuracy.

CLIENT WEBSITES — Freelance & Agency

[srmfilms](#) / [suhora](#) / [retaggioindustries.com](#) / [makemydaycafe](#)

- Problem: Businesses lacked modern, responsive web presence.
- Role: Designed and developed responsive websites using HTML/CSS and WordPress.
- Approach: Designed responsive layouts, customized WordPress themes, and optimized for mobile and SEO.
- Outcome: Improved brand presence and user experience.

Seeking a product-led company where I can lead design, mentor teams, and build meaningful user experiences.
